

# Shabbos Food Matching Game

By Rivka Hafner

**Grade Level:** Early Childhood

**Description:**

A game in which students hone their visual discrimination and memory skills in order to find sets of matching Shabbos foods. Use as a supplement to a Shabbos unit.

**Materials Needed:**

- Color printer
- Heavy cardstock
- Scissors

**Instructions:**

1. Copy two sets of sheets per student.
2. Have students cut out the squares.
3. To play, turn cards face down and take turns trying to find sets.

**Additional Tips:**

- Before running off multiple copies, print just one page and check whether the pictures can be seen through the other side of the paper. If it can be seen, either use thicker paper or create a backing for the cards.
- To make the game move faster, or for very young students, once a player has exposed a card, leave it face up instead of turning it back over. This will make it easier for the next player to find a match.
